Agence Nationale de Sécurité du Médicament et des Produits de Santé (ANSM)

143-147 Boulevard Anatole France, 93285 Saint-Denis Cedex, France

Reference:	2024-518877-22-00-RFI
Date issued:	02 April 2025
EU CT Number:	2024-518877-22-00
Member State Concerned:	France
Procedure stage:	Assessment
Trial title:	A Phase 2/3 Study Evaluating a Novel GLP-1/GIP Dual Agonist in Combination with Standard of Care in Non-Small Cell Lung Cancer
Therapeutic indication:	Non-Small Cell Lung Cancer (NSCLC)
Sponsor:	Novo Nordisk A/S

NOTICE OF ASSESSMENT REQUEST FOR INFORMATION

Pursuant to Regulation (EU) No 536/2014 on clinical trials on medicinal products for human use, the competent authority has completed its assessment of the above-referenced clinical trial application and has identified the consideration(s) set out below. The sponsor is requested to submit a written response addressing each consideration within **12 calendar days** of the date of this notice.

Consideration 1

Consideration ID: 2024-518877-22-00-C1 | CTR Reference: Article 6, Part I Assessment

The statistical analysis plan (Protocol Section 9.4) does not adequately justify the sample size assumptions used to power the primary endpoint of Progression-Free Survival. Please provide the underlying assumptions, including the assumed hazard ratio, the source of this assumption, and its clinical justification.

Consideration 2

Consideration ID: 2024-518877-22-00-C2 | CTR Reference: Article 6, Part I Assessment

The benefit-risk assessment (IMPD Section 7.1) does not sufficiently address the long-term cardiovascular safety signal observed in the Phase 2 dose-escalation cohort. Please provide an updated risk mitigation strategy, including proposed monitoring measures for the Phase 3 population.

Consideration 3

Consideration ID: 2024-518877-22-00-C3 | CTR Reference: Article 6, Part I Assessment

The proposed dose-escalation stopping rules (Protocol Section 6.3) are not clearly aligned with the toxicity grading criteria referenced in Appendix 4. Please clarify how dose-limiting toxicities will be adjudicated and by whom.

Failure to respond within the specified period may result in the application being deemed withdrawn in accordance with the applicable provisions of Regulation (EU) No 536/2014.

Yours sincerely,

Agence Nationale de Sécurité du Médicament et des Produits de Santé (ANSM) — Clinical Trials Assessment Unit
On behalf of the Competent Authority
